CERTIFICATE OF ANALYSIS

Polyvinyl Chloride Resin (PVC resin) SG5

Inspection Standard No. : GB/T5761-2018

Application: As a kind of important organic chemical raw material, PVC resin can be widely used for tubing, moulded plate, cable, film etc. in light industry, architectural & agricultural line.

SG-5		Premium Grade
items		standard
viscosity number ml/g		118-107
K-value		68-66
The average degree of polymerization		1135-981
number of foreign particles		16max
volatile (including moisture) content, %:		0.40max
bulk density, g/ml		0.48min
sieve residue,%	250 um Mesh Size	1.6max
	63 um Mesh Size	97min
number of fish eyes, / 400cm^2		20max
quantity of plasticizing agent absorbed by 100g resin, g:		19min
whiteness (160°C, after 10min),%		78min
residual content of vinyl chloride, ppm		5max
